Date: 21/8/2026
Ref. Doctor: Dr. Self Refer
Sample Type: Whole Blood / Serum

MRI REPORT

Procedure Performed:
MRI Examination
Clinical History / Indication:
Routine diagnostics checkup

RADIOLOGICAL FINDINGS:

Brain MRI shows normal ventricles and sulci. No acute intracranial hemorrhage, mass effect, or large territorial infarct is identified. Normal flow voids of the major intracranial vessels are noted.

Clinical Interpretation & Comments:

- Clinical correlation is recommended for definitive diagnosis.
- Please consult the referring doctor with this report for further management.

Technician Signature

Dr. R. K. Mehta (MD, Pathology)
Chief Pathologist
